

# BUSINESS (COMMUNICATIONS) CONTINUITY

We have experienced it all over recent months, with travel, weather, and now the Covid -19 virus threatening our personal routines and the integrity of our business performance.

Whilst we cannot prevent these issues, we can consider how we can use what we have to help mitigate the risk, disruption, and costs. Having already invested in a Mitel Platform you will already have a comprehensive range of “flexible working” options available to implement right now.

## PROBABLY THE BEST DECISION YOU WILL EVER MAKE

### SEASONAL ILLNESSES

In the event of seasonal illnesses, you need to be ready to keep your business going.

### TRAVEL DISRUPTION

Travel disruptions can severely delay or prevent staff from reaching their place of work.

### WEATHER DISRUPTION

Each year, extreme weather seems to be a bigger threat to UK businesses.

## MORE GREAT REASONS FOR REMOTE WORKING

### ENSURES CONTINUITY OF OPERATIONS IN THE EVENT OF A DISASTER

75%

of remote workers say they could continue to work in the event of a disaster compared with just 28% of office workers.

### IMPROVES EMPLOYEE SATISFACTION

95%

of employers stated that allowing telecommuting increases employee retention rates.

### REDUCES ATTRITION

55%

of people felt more stressed as a result of their commute (*average journey to work in the UK is between 60 - 80 minutes*).

### REDUCES UNSCHEDULED ABSENCES

78%

of employees who call in sick, really aren't. They do so because of personal matters.

### INCREASES PRODUCTIVITY

60%

of commuting time is spent performing work for the company by its employees.
